AIM AND SCOPE
The Journal of Engineering Science and Technology Review is a peer reviewed international journal publishing high-quality articles dedicated to all aspects of engineering. The Journal considers only manuscripts that have not been published (or submitted simultaneously), at any language, elsewhere. Contributions are in English. The Journal is published by the Kavala Institute of Technology. Copyright is by the publisher and the authors. The Journal is issued both in electronic format (for free) and in printed form as annual volume (free for the authors). The Journal accepts 9 types of articles defined as follows:

1. Research Articles: A research article is a regular article which aims to present new findings.
2. Letters to the Editor: A letter to the editor is a short article which aims to present new findings that require fast publication procedures.
3. Notes: A note is an article (regular or short) which aims to present rather new findings.
4. Comments: A comment is a short article that makes comments on another article already published by this Journal or replies to a comment.
5. Review Articles: A review article is an article which aims to present comprehensively already existing findings.
6. Lecture Notes: A lecture note is a short review article.
7. Monographs: A monograph is a thesis of one or more authors on a unique subject; apart form the standard reviewing procedures, a monograph must be accepted from a committee of specialists appointed by the Editor.
8. Innovations: An innovation is an article which aims to present new procedures or devices.
9. Selected conference articles: Upon an agreement with a conference committee, selected papers may be published by the Journal in a special section. In this case the editor will appoint in collaboration with the conference committee guest editors.

ETHICAL NOTES
An author is a person who has a substantial contribution to the article; all other contributions should be mentioned as acknowledgments. Authors should cite only the articles which have contributed to their work; unnecessary citations should not be listed. Authors should present their work as objectively as possible. Arguments that discriminate people by race, sex, origin, religion, etc are not accepted. Bogus results must not be given. Reviewers should not take advantages from the manuscript; instead, they should help the authors to improve their work. Reviewers should not criticize in public the manuscripts. The Editor guarantees the anonymity of the reviewer.
